

There are many ways to alter a book and in this demo I will show you one of my favorites because it is almost like magic. Please join me on November 11 where we will transform a sheet of paper into a twisted, pleated artwork. The process will transform images from both sides of the paper into something new.

Materials:

* 8.5" x 11" (or 9" x 12" or 8" x 10"; for the demo don't go smaller than these sizes) paper that has an image on one side and is white on the other. This can be paste paper, marbled paper, a magazine image, etc. The paper should be easy to fold. Heavyweight paper will make it very difficult. ***There should be high contrast between the two sides. For the demo it is best to use paper that is solid on one side and patterned on the other.***

- * Bone folder
- * Pencil
- * Scissors
